Directors' report to the shareholders

We are pleased to submit this report of our sixteenth year of operations. It has been a challenging year and a period of consolidation and adjustment in the face of ever increasing costs and of competition.

The past few years have been notable for the intense competition in food retailing. An almost distinct pattern had developed with periodic escalation of competitive activity followed by easing of the pressures.

Fierce "price wars" and advertising campaigns have been waged, resulting in reduced profit margins for some of the contestants and outright losses for others. Such peaks of activity have been succeeded by periods of relative stability in the industry and hopes of improving profit margins.

Fiscal year ended April 30, 1972, was in fact a period of improved business conditions and easing of competition. This was very clearly reflected in our operating results for that year. We had hoped that such conditions would continue during fiscal year 1973 but there were still some late entries in the competition for alleged savings and convenience to the consumer.

This year has been further complicated by the escalation of all costs but in particular of the cost of food. These extraordinary increases in food costs have sparked unprecedented consumer awareness and activity and have resulted in a further tightening of gross profit margins.

We have been faced with rapidly increasing costs of operations combined with the difficulty of obtaining a higher gross profit on sales from the already hard pressed consumer. Now the measurement of each stores contribution to the overall profit of our operations has become even more important than before.

In the past few years we have found it advantageous to close some marginal stores. Due to the escalation of costs, some stores which produced some profit before may now be unprofitable at the same level of sales and should be closed in the interest of overall operating efficiency.

The continued evaluation of store performance in the light of current conditions and costs is reflected in the number of outlets closed during the year. A total of 21 stores were closed,

19 of these in our original marketing area in and around Metro Toronto.

The openings of new stores too reflect the caution exercised in selection and only 39 new stores were opened. The resulting net increase in the number of outlets was 18 stores or 5%. Due to the relatively higher number of closed stores in the Metropolitan Toronto area, over 60% of the net additions to stores were in areas outside Metro.

It has been disappointing to us that during this past year we were not able to establish new performance records again. However, the results must be evaluated in the light of the current conditions.

Considering the adverse conditions, we feel that our operating results were very satisfactory.

Our sales reached \$76,084,930, an increase of 11%. The net earnings from operations showed a decrease of 15% to \$1,364,698. This is the equivalent of 77 cents per share and compares to 92 cents per share for the previous year.

We are confident that the changes and adjustments made during the last year will continue to exert favourable influence upon our future operating results and growth. We are particularly pleased with the results during the year of our experimental franchising programme. It appears that the direct interest of the franchisee and his ability to institute economies of operation have made this limited programme an unqualified success. We have already taken steps to expand and accelerate this programme.

The experience gained from our franchising programme has enabled us also to start making certain changes in the operation of Company owned stores. Here some managers now have greater interest in the operations and can benefit from the economies in some expenses controllable by themselves.

Our confidence in the continued growth and profitability of our operation is reflected in the steps taken dur-

ing the year to further expand our Becker Country and in the significant capital expenditures undertaken at our plant to enlarge and modernize our ice cream production facilities.

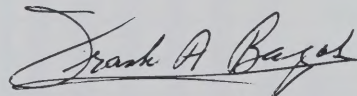

From the map of our Becker Country you will see that our area of operations has now been increased by the addition of a milk marketing area to the east of our previous boundaries. The purchase of the Marmora Dairy came late in our fiscal year and the opening of our first store in the area was after the year end.

Capital expenditures for store acquisition and construction have continued at about the same level as during the last few years. The most important capital expenditure during the past year has been at our plant. We have added 23,000 square feet of much needed ice cream storage and production area and have installed new machinery. This new facility is scheduled to start production early in our new year.

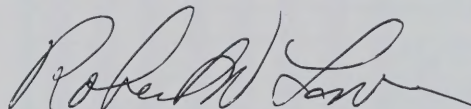

We have been able to finance our capital expenditures from the cash flow from operations and still retain a favourable working capital position.

We are looking forward to an excellent year and expect to be able to return to the establishment of new records of growth and profitability. We are confident we can reach this goal with the continued support of our staff, suppliers, shareholders and of course, most important, our Customers in the Becker Country.

Sincerely,

Chairman of the Board

President

The Company has contested two assessments levied by the Ontario Retail Sales Tax Department for the period November 1, 1964 to April 30, 1970. The first assessment in the amount of \$163,375 has been paid and the second assessment in the amount of \$272,776 is still unpaid. The Company has received an opinion of legal counsel that at the present time it can successfully defend the foregoing assessments.

4. SERIES C DEBENTURES

The authorized maximum loan from the Company's bankers under these debentures is \$4,000,000. Draw-downs may be made in minimum amounts of \$500,000 to June 30, 1974. Repayment of the principal is to commence not later than December 31, 1974 in annual principal instalments of not less than 10% of total loans then outstanding. The loan may be prepaid at any time without notice or bonus. The Company's bankers will receive warrants to purchase class B shares at the rate of a warrant to purchase 2,000 shares per \$500,000 loan so drawn-down in excess of \$1,000,000 until warrants to purchase an additional 12,000 shares have been issued. The price per share shall be 10% above the closing bid quotation on the day previous to the draw-down with respect to which the warrants were issued and may be exercisable for a period of five years from the date of the draw-downs. Under an extension agreement, the bank's purchase price for the 4,000 shares per warrants issued to date has been reduced from \$19½ (the price applicable at the date of draw-downs) to \$15 each. The debentures are secured by a charge on all assets presently owned and hereafter acquired. Dividends may be paid on any class of shares provided capital and retained earnings exceed \$3,250,000.
